Owner-ship	FILE	Return to 607	HAB

We have been requested to obtain an industrial waste permit as described completely in the attached letter from the County of Los Angeles, Department of County Engineer, in order to continue dumping on a plot of land owned by Shell Chemical Corporation in the vicinity of the Torrance Plant.

The site referred to by the County Engineer lies between Moneta Avenue and Main Street north of Knox Street. It is identified on the maps as Lot 115. Lot 115 has been used since 1943 as a dump site for concrete, brick, asphalt paving, dirt and similar noncombustible, water insoluble rubbish originating solely from the Torrance Plant. During Government ownership, a portion of the northeast corner of Lot 115 was deeded to the Los Angeles County Flood Control District for future realignment of Dominguez Channel. Since Shell Chemical Corporation purchased the Torrance Plant, including Lot 115, a portion of the southwest corner of the plot was sold to the State of California, Division of Highways, for future freeway construction. The part of Lot 115 that remains consists of more than four acres, but less than five. It is desired to continue using Lot 115 in the same manner it has been utilized in the past; i.e., a Class III private disposal site, not open to the public, with land reclamation the ultimate aim.

It is our understanding that you normally handle problems of this type and we would greatly appreciate your taking the necessary action to obtain the permit. To assist you in the project, we will engineer the plan as outlined on page 5, section (b) of the attached "Procedure for Establishment and Regulations for Operation of Waste Disposal Facilities" and provide you with the required number of prints. Assistance in obtaining the answers to questions which may arise in connection with your work can be obtained directly by telephoning Mr. A. E. Martin - Senior Technologist (FAculty 1-2340) at the Torrance Plant. *art* STYRENE

- Ex-568 -

Yours very truly,

M. Voogd  
Plant Manager
